

# Enabling third-party cookies

iPhone and iPad

Tap the "Settings" icon on your homescreen

Scroll down and select "Safari"

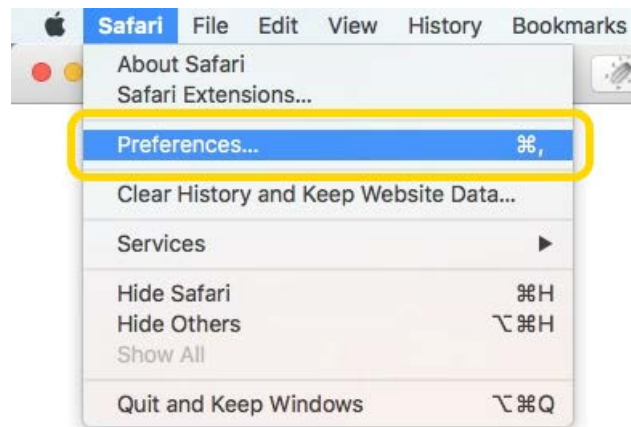

Scroll down to the "Privacy & Security" section and select "Block Cookies"

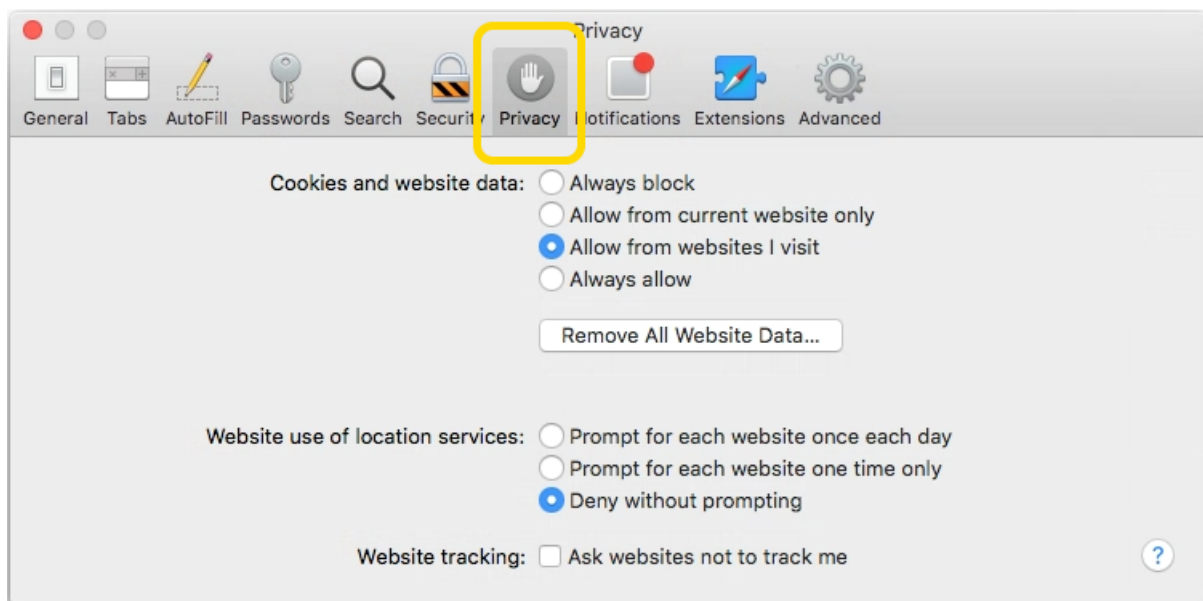

Change this setting to "Always Allow"

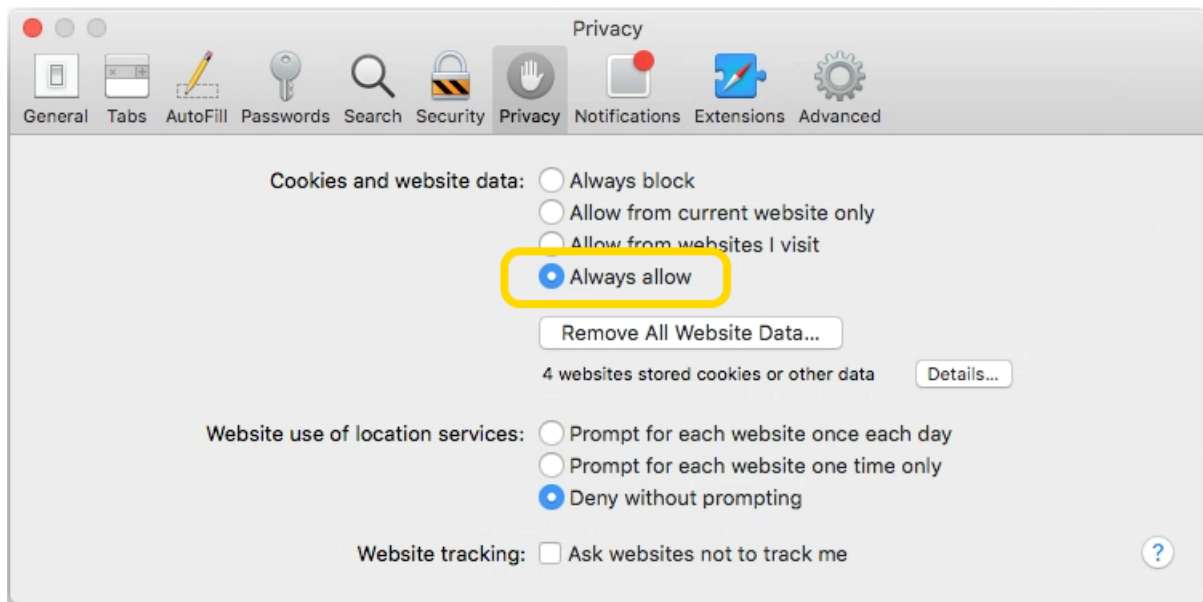

## Desktop Safari

With Safari open, open the “Safari” drop-down menu and select “Preferences...”

Choose the “Privacy” tab along the top of the Settings window

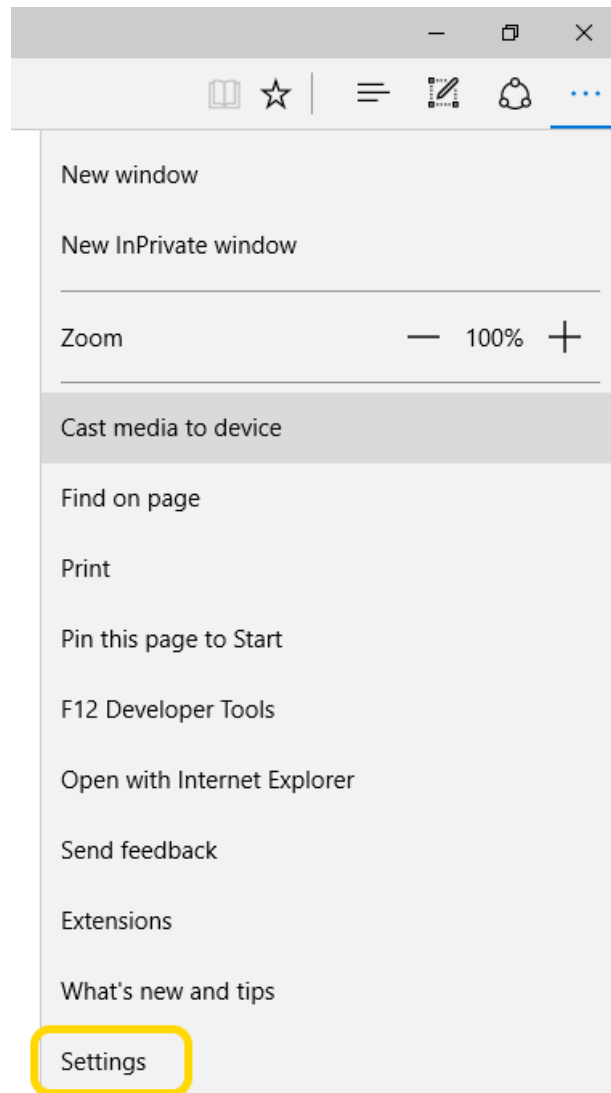

Set “Cookies and website data:” to “Always allow”

## Microsoft Edge

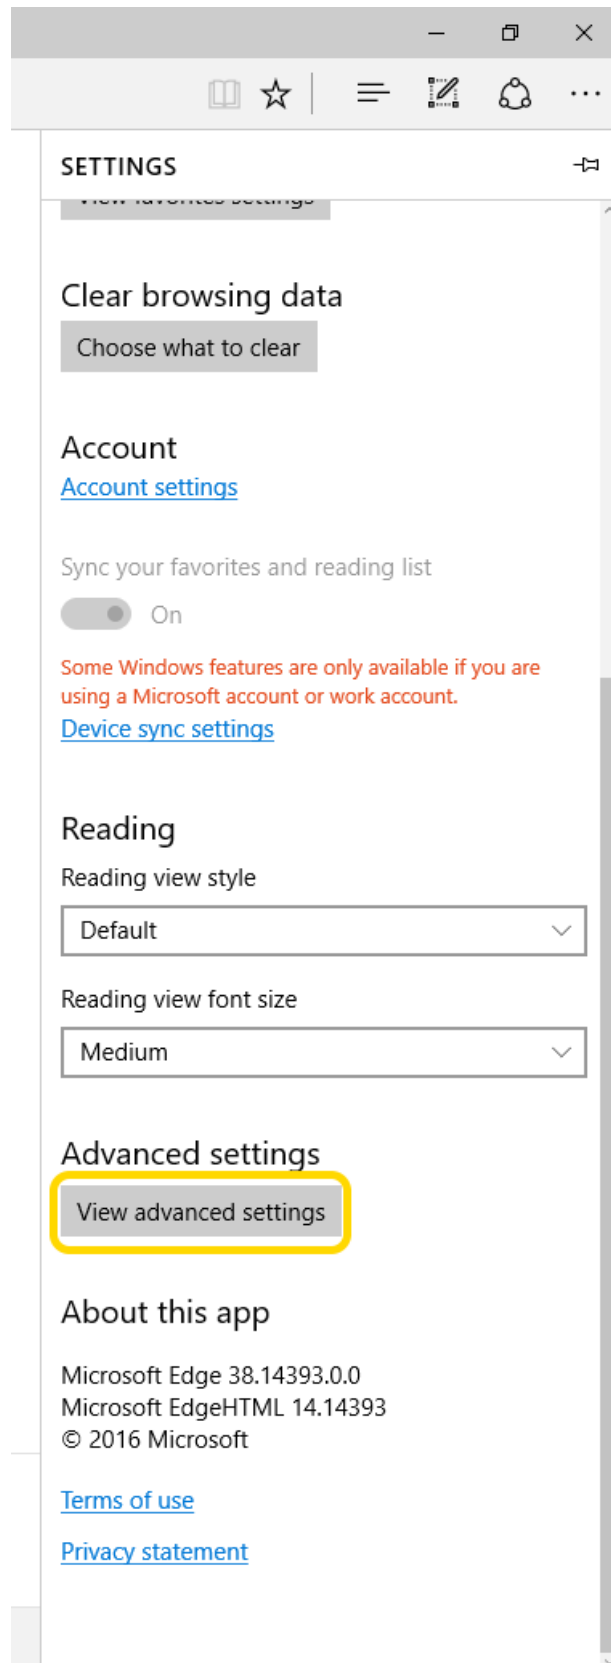

Open Edge and click the “three dots” icon in the top-right of the window

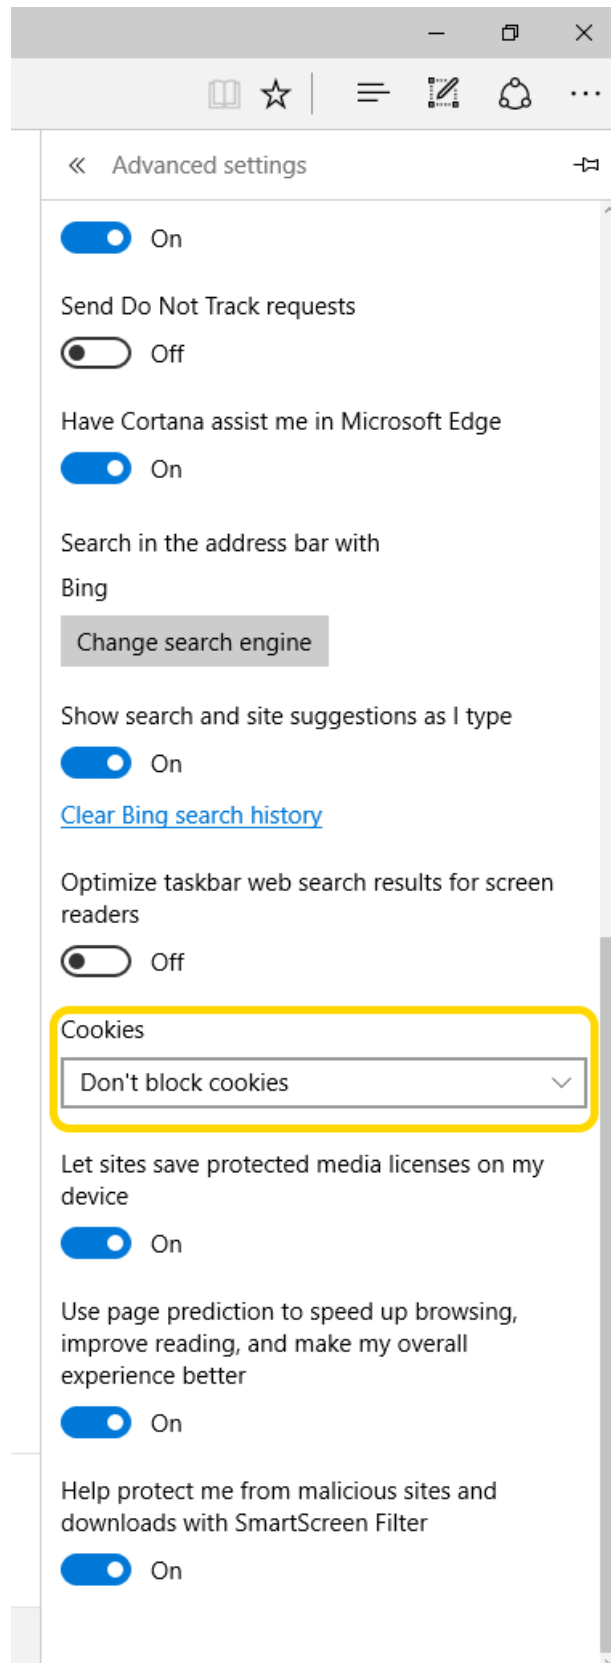

Choose "Settings" from the bottom of the drop-down

Scroll the Settings panel down and click the “View advanced settings” button

Scroll the Advanced Settings panel down and select the “Cookies” drop-down

Change this setting to “Don’t block cookies”
